WABCO Vehicle Control Systems is one of the world's leading providers of electronic braking, stability, suspension and transmission automation systems for heavy duty commercial vehicles. WABCO's customers include the world's leading truck, trailer and bus manufacturers in every region of the world. We aim to reduce the overall operating costs of our customer's vehicles and also help to improve their performance, safety, efficiency and service life.

WABCO's global aftermarket network supports fleet owners and operators over the lifetime of their vehicles through a range of innovative products and services, a global network of Distributors and Service Partners, and state-of-the-art training centres.

The WABCO UK Trailer & Aftermarket team are committed to offering excellent service and product quality to our customers.

Distributors, fleets, workshops and WABCO approved Service Partners have access to our sales desks, technical desks, WABCO website, service engineers and sales managers on a daily basis. We also have a purpose-built training and workshop facility at our UK headquarters in West Yorkshire.

WABCO University aims to build on WABCO's unique track record as a provider of professional training solutions for the commercial vehicle industry dating back to the early 1970s. Launched in 2006, WABCO University is a centre of excellence designed to support the diverse qualification needs of customers worldwide across a number of platforms.

WABCO University offers training courses in almost every language and e-learning courses in seven languages, including German, Chinese and Russian. Participants can attend sessions at one of WABCO's 14 training centres worldwide or at a location of the customer's choice, e.g. through e-learning which is offered online.

WABCO UK's Training Centre is conveniently located in West Yorkshire and all our courses last for one day* and commence at 9.30am. Our experienced trainers believe in getting people involved in the training sessions, so we offer valuable hands-on experience via the use of purpose-built test rigs, and a fully equipped truck and trailer combination based in our dedicated training workshop. WABCO training courses cover installation, diagnosis and maintenance of Anti-Lock Braking Systems (ABS), Electronic Braking System (EBS), and Electronically Controlled Air Suspension (ECAS) Systems.

*Please note that Trailer EBS E consists of two parts, over two consecutive days.

We offer a variety of training courses at both our West Yorkshire head office and customer locations.

To discuss and confirm your training requirements, please e-mail: customer.training@wabco-auto.com or visit the WABCO University homepage at: www.wabco-auto.com/service_support/wabco_university

Any course can also be held offsite depending on the location, facilities available and the number of attendees.

FEB	
7th	Trailer EBS D
8th	Trailer EBS E pt1
9th	Trailer EBS E pt2

JULY	
3rd	Trailer EBS D
4th	Trailer EBS E pt1
5th	Trailer EBS E pt2

MARCH	
6th	Truck EBS
7th	ECAS

Truck Diagnostic Case

WABCO System Diagnostics (SD) is a software program available for every WABCO-produced component requiring diagnosis. The program consists of a range of Windows-based software solutions, plus all the required hardware needed to carry out diagnostic work on WABCO systems, such as, Electronic Braking System (EBS), Electronically Controlled Air Suspension (ECAS) and Anti-Lock Braking System (ABS).

WABCO SD has continued to grow with more than 40 different software options now available. The access to SD software is via myWABCO which is the personal 'dashboard' of WABCO's online services.

For more details please visit:
<http://www.wabco-auto.com/en/sd.html>

WABCO WÜRTH is the only multi-brand diagnostic system for commercial vehicles worldwide that integrates the original WABCO System Diagnostics into a complete solution.

With its innovative solutions, WABCO WÜRTH makes diagnostics easy, transparent and efficient, and efficient diagnostic systems help to keep your business moving.

We provide you with regular updates which help to keep your diagnostic system as up-to-date as possible. The multi-brand diagnostic solutions from WABCO WÜRTH help to deliver quick, precise, reliable and comprehensive results for the majority of popular brand vehicles.

Every WABCO WÜRTH solution takes the complexity and high development tempo of commercial vehicle technology into account.

For further details about WABCO WÜRTH please visit the website at:
