

SCANDRIVE 5

Remote download of
tachograph data

Installed outside the office and connected to the Internet, the ScanDrive 5 terminal helps drivers read out all tachograph data themselves, in full compliance with legal requirements.

TECHNOLOGY

The ScanDrive 5 terminal communicates with computers or local networks via VPN (Virtual Private Network).

CONFIGURATION

When installing the terminal, you define how you want the data to be stored.

DATA COLLECTION

The drivers download their data in the terminal, after which the archives are transferred to the archiving file

DUTY TIME MANAGEMENT

If you use TX-VISIO WEB, all data are automatically imported into the application.
