

TX-BOX 2

Remote download of
tachograph data

TX-BOX 2 is a mobile, autonomous download tool that helps you collect all tachograph data directly from the fleet.

CONFIGURATION

You can easily configure the time / period of download as well as the download format.

DATA COLLECTION

The compliant driver card data, as well as the tachograph's mass memory can be directly downloaded in the vehicles.

DATA TRANSFER

When back in the office, all drivers have to do is connect the box to the computer to directly transfer the compliant data to the archiving application.

DUTY TIME MANAGEMENT

If you use TX-VISIO WEB, all data are immediately available in the application.
