

Combine with the TX-FLEX driver app

TX-FLEX is a mobile add-on for the TX-SKY on-board computer. It is a driver app, running on an Android device, facilitating all driver activities outside the truck cabin, for instance, barcode & document scan, picture & document transfer, digital signatures & customer comments, pallet information and problem reporting. The data are synchronized via Bluetooth with the TX-SKY and sent to the TX-CONNECT back office platform for further processing from the TX-SKY or also optionally from TX-FLEX.

Moreover, the advanced TX-FLEX integration possibilities also enable fleet managers to integrate additional apps & software, both from Transics and third parties, such as navigation software, digital CMR and truck & trailer inspection apps, to name a few.

-  On-board computer add-on
-  Driver app for smartphones, tablets or ruggedized PDAs
-  Support of out-of-cabin activities
-  Bluetooth for synchronized data flow between TX-FLEX & TX-SKY
-  GPRS for transferring vehicle & driver information to back office

TX-SKY

Link your fleet to the home base

What is TX-SKY?

TX-SKY is a powerful, fixed mounted on-board computer with a touchscreen. It is fully integrated into our multifunctional TX-CONNECT back office software and comes standard connected to the vehicle's CAN bus and tachograph. TX-SKY registers all driver and truck information as well as the data from other sources, such as temperature sensors and document scanners. As a secured gateway, TX-SKY enables the driver and dispatcher to exchange information in real time.

RELIABLE CO-PILOT

SECURED GATEWAY OF FLEET DATA

COMMUNICATION CHANNEL BETWEEN DRIVER AND HOME BASE

Why use TX-SKY?

TX-SKY sets the standard in telematics fleet hardware. Based on a high-performance platform, its tablet-style interface ensures the best possible user experience. This ease-of-use as well as its plug-and-play installation guarantee a low total cost of ownership.

- ✓ Future-proof driver tool
- 📈 Facilitating greater fleet efficiency and ROI
- 🌐 Integration with multifunctional TX-CONNECT platform
- ⚙️ Easy installation, remote configuration and support
- 📱 Intuitive user interface
- ⚡ Powerful processor and extensive internal memory

How to use TX-SKY?

TX-SKY helps drivers to perform their daily activities and reach their destination with ease and within time. The TX-SKY technology minimizes all administrative hassles, so that drivers can maximally focus on a safe and ecologically sound transport.
