

TX-VISIO RDL

Remote download of
tachograph data

Installed in the vehicle and equipped with GPRS technology, the TX-VISIO RDL box downloads all the compliant driver and vehicle data, wherever the driver / vehicle may be.

TECHNOLOGY

The GPRS-driven data communication, which works with a SIM card, is available by simple subscription.

CONFIGURATION

You can configure the frequency of the archive download on the server.

DATA COLLECTION

The legal data are available to the users via the WEB portal.

DUTY TIME MANAGEMENT

If you use TX-VISIO WEB, all data are automatically imported into the application.
